## ABOUT ME

Senior Frontend Engineer with 5+ years of experience specializing in JavaScript, TypeScript, React, and Angular. Proven track record in architecting enterprise micro-frontends, high-performance state management systems, and reactive asynchronous workflows for high-scale applications in fintech and telecommunications. Holds a Joint Bachelor's Degree in Business Administration & Law and currently completing a Bachelor's Degree in Software Engineering.

## WORK EXPERIENCE

### SENIOR FRONTEND DEVELOPER (REACT) – CAIXABANK – Oct 2024 – Current – SEVILLE, SPAIN

- Syndicated Loans Enterprise Platform:** Serving as the sole Frontend Engineer architecting the new internal application for corporate syndicated loan management (€500M+ client turnover).
- Developer Productivity Dashboard:** Co-led frontend development of an internal developer platform used by 1,000+ software engineers to orchestrate workflows, tasks, and scheduling.
- Micro-Frontend Architecture:** Integrated isolated micro-frontends using Single-SPA technology and state synchronization across modules via shared Nano Stores.
- Custom State & Fetching Engines:** Engineered a proprietary lightweight state management solution using React Context API to circumvent library constraints, along with a custom data-fetching engine supporting optimistic updates and client-side caching.
- UI/UX Stability & Patterns:** Refactored the dashboard grid system using React-Grid-Layout for dynamic stability. Separated business logic from presentation using advanced React patterns (HOCs, Compound Components, Render Props).

### FRONTEND DEVELOPER (REACT) – VODAFONE – Jan 2024 – Sep 2025 – SEVILLE, SPAIN

- B2B Web Platform:** Developed Vodafone's enterprise business portal using React 18, TypeScript, and a micro-frontend architecture built on Module Federation.
- State & Data Pipeline:** Streamlined API communication and state synchronization using Redux Toolkit, RTK Query, and Styled Components.
- Mobile Application Development:** Built cross-platform mobile features for Vodafone's enterprise application using React Native.

### FRONTEND DEVELOPER (ANGULAR) – VODAFONE – Aug 2022 – Jan 2024 – SEVILLE, SPAIN

- Reactive Web Architecture:** Developed reactive web features for Vodafone's consumer platform using Angular 15+, TypeScript, RxJS, and NgRx to handle complex asynchronous data streams and high-volume customer data.
- Analytics Telemetry Integration:** Architected the client-side data pipeline connecting web events to Tealium analytics for real-time customer behavior tracking.
- Testing & Quality Assurance:** Implemented unit test suites using Jest to maintain code coverage and engineered modular styles using SASS.
- Cross-Framework Delivery:** Developed key promotional web flows in React, including the mobile rate configurator tool.

### FRONTEND DEVELOPER (ANGULAR) – GEOGRAMA – Jan 2022 – Jul 2022 – ÁLAVA, SPAIN

- GIS Visualizer Engineering:** Led frontend development for the official Álava province Geographic Information System (GIS) public mapping portal using Angular and OpenLayers.
- Geospatial Data Rendering:** Rendered complex geospatial vector and raster datasets into interactive high-performance map interfaces.

### FRONTEND DEVELOPER (ANGULAR) – GUADALTECH SOLUCIONES TECNOLÓGICAS – Oct 2021 – Jan 2022 – SEVILLE, SPAIN

**Cross-Platform Mobile Development:** Developed hybrid mobile application components using Ionic and Angular for client enterprise projects.

## EDUCATION AND TRAINING

SEP 2021 – CURRENT

**SOFTWARE ENGINEERING BACHELOR'S DEGREE** Catalonia Open University

**Focus:** Software Lifecycle, Low-Level Memory Management, Data Structures & Algorithms (Big-O analysis), Object-Oriented Design, and Database Architecture.

**Core Stack:** C, Java, Assembly, JavaScript, TypeScript, PostgreSQL, Oracle, AWS.

JAN 2021 – SEP 2021

**WEB DEVELOPMENT FULL-STACK BOOTCAMP** Ironhack

**Focus:** Practical program in Full-Stack Web Development (HTML5/CSS3, JavaScript ES6+, React, Node.js, Express.js, MongoDB, Git).

SEP 2014 – JUL 2024 Spain

**JOINT DEGREE IN BUSINESS ADMINISTRATION AND LAW** University of Seville

**Focus:** Civil Law, Finance, Accounting, Strategic Management, and Regulatory Frameworks.

## SKILLS

### Frontend

React.js | Angular | TypeScript | JavaScript (ES6+) | Next.js | Redux Toolkit | NgRx | SingleSPA | Module Federation | RxJS | RTK Query | CSS3/SASS | React Query | HTML5 | Styled-Components | Tailwind CSS | Jest | React Testing Library

### Backend & Mobile

Node.js | Express.js | React Native | RESTful APIs | PostgreSQL | MongoDB | Java | C

### Tooling & Architecture

Micro-Frontends | Webpack | Git | Design Patterns | Web Components (Stencil.js)

## PROJECTS

SEP 2026 – SEP 2026

**ParkXchange**

Peer-to-peer, real-time parking marketplace that allows drivers to announce, discover, reserve, and hand over on-street parking spaces through a geospatial mobile app.

**Tech Stack:** Go, net/http, PostgreSQL/PostGIS, WebSockets, TypeScript, Expo/React Native, MapLibre, JWT authentication, pnpm workspaces, Turborepo, Docker, and Task.

**Link** <https://github.com/leakko/ParkXchange>

JUN 2023 – SEP 2024

**Portfolio**

Responsive personal portfolio website to showcase professional experience, education, and technical skills, featuring section-based navigation, dark mode, a contact form, and CV download functionality.

**Tech stack:** Next.js 14, React 18, TypeScript, Tailwind CSS, Radix UI, React Hook Form, Zod, EmailJS, ESLint, and Husky.

## PUBLICATIONS

2023

**[Understanding Angular View / DOM manipulation \(In-depth analysis\)](#)**

Technical article breaking down Angular's view engine internal mechanics, change detection strategies, and optimal DOM manipulation practices.
